Promoting Transparency & Accountability in Nepali Governance

Jawafdehi.org team

December 23, 2022

What is jawafdehi.org?

An open-source civic technology platform dedicated to promoting transparency and accountability in Nepali governance.

Mission: Create a comprehensive, transparent, and accessible database of corruption cases in Nepal, empowering citizens with information and promoting accountability in governance.

Its value proposition - What would be most useful?

- **For Citizens:** Access to verified corruption case information
- **For Journalists:** Structured data and research support for investigations
- **For Researchers:** Comprehensive datasets for academic analysis
- **For Civil Society:** Evidence-based advocacy tools
- **For Nepal:** Long-term institutional memory against corruption

Our Core Offering: AgniAI

AI-assisted data enrichment system that transforms raw documents into structured data through intelligent processing.

Key Capabilities

-  **Source:** Government sources (CIAA, etc.), media (online newspaper and Facebook), and direct sources
-  **Smart Matching:** Links to existing NES database from the sourced data
-  **Human-in-the-Loop:** Interactive review workflow for integrity

How to keep it relevant in low resource?

- **GenAI Integration:** AgniAI automates bulk data processing, extraction, and data enrichment
- **Community-Driven:** Leverage volunteer case workers, open-source development
- **Strategic Partnerships:** Collaborate with media and non-profits for data sharing

How to make this happen collaboratively?

- **Case Information Sharing:** Partners contribute corruption case data, documents, and insights
- **Open Source/Open Data:** Code, data, and processes publicly available for transparency and collaboration
- **Partner with Stakeholders:** Media, academia, and civil society organizations

Questions & Discussion

Thank you for supporting transparency in Nepal! 🇳🇵
